

National Breast Cancer Awareness Month

As we recognize Breast Cancer Awareness Month, we remember those who have lost their lives to the disease, and we voice our support for those in the fight of their lives.

In the battle against breast cancer, early detection is a powerful weapon. In fact, according to the National Cancer Institute, when breast cancer is detected in an early, localized stage, the five-year survival rate is 98 percent. That's why it is so important to make breast health awareness a regular part of their healthcare routine.
