Schoharie County Office of Community Services requests proposals for projects utilizing Opioid Settlement Funds

March 2024 - Schoharie: The Schoharie County Office of Community Services is accepting Requests for Proposals (RFP) for Opioid Settlement Funding. Up to \$204,000 will be awarded to community-based organizations, non-for-profit agencies, and businesses to help address overdoses and substance-use disorders in the community through prevention, treatment and recovery services. Sarah Nies, Director of Community Services, said "she is excited to see what solutions can be found within the community around the opioid crisis in Schoharie County. This is an opportunity for the community to come together and come up with solutions for its residents." Nies added that this crisis impacts all of us. "Recovery is more than abstinence and symptom reduction,' she said. "We need to be about people, place, and purpose in recovery."

Justin Hamm, Executive Director at Schoharie County Council on Alcoholism and Substance Abuse (SCCASA), also emphasized his support. "In order for Schoharie County to continue to combat the opioid crisis there needs to be a continued collaborative approach between prevention education, treatment, and recovery services. These dollars will help us fill in the gaps in services along the continuum of care," Hamm said.

The RFP is available for review and applications will be accepted on a rolling basis, with evaluation of proposals to be completed by the committee as applications are submitted. Once selected, the successful applicants will then be presented to the Schoharie County Board of Supervisors for contracts. Applicants will be asked to target at least 1 of the approved uses from the "Schedule C Approved Uses" document that can be found on the county website along with the RFP. Additionally, work for the award must be completed in Schoharie County.

Construction loans made easy. Scan to see how NBT Bank can get you moving!

Charge up your car battery knowledge Vehicles consist of many case of the second secon

Vehicles consist of many essential components to keep them running efficiently and effectively. Car and truck owners should have an understanding of how their vehicles function so they can diagnose and address problems as they arise.

Car batteries are an important component of any vehicle. Even though engines are the powerhouse of any car or truck, without a battery, the engine wouldn't be able to work. According to experts car batteries work by providing a jolt of electricity necessary to power all the electrical components of the vehicle. This is achieved through a chemical reaction that changes chemical energy into the electrical energy needed to deliver voltage to the starter. In addition to initially starting the car, the battery also keeps electric current steady to keep the engine running. The battery also works in conjunction with the alternator to power the electronics in the car, according to the automotive information blog Autosessive. While the car is running, the alternator reverses the current produced by the battery, recharging it as a result. This happens during

long journeys, so people who drive for short bursts of time may find that

their batteries will not have a chance to recharge and may not have the

longevity desired.
There is quite
literally a lot riding
on a functioning
battery. No one
wants to be caught
stranded by a dead
battery, so drivers
may wonder if there
are any indicators
that may signal the
battery needs
replacement.

• Slow turnover: If a vehicle does not immediately start or if the cranking is

• **Frequent, short trips:** Drivers who make frequent, short trips may find their car batteries do not have time to fully recharge. This, coupled with overtaxing thanks to a lot of accessory use, may cause the battery and the alternator to have shortened life spans.

- Low battery fluid levels: If the fluid level is below the energy conductor inside, it is often indicative of overcharging and excessive heat.
- **Corrosion:** Corrosion buildup, dust, dirt, and grime on battery connections may cause performance problems. Inspecting and cleaning the terminals can prolong the battery life.
- Odors and leaks: Battery leaks can produce a sulfur odor similar to the smell of a rotten egg. This can become problematic over time, and leaks may indicate an aging or damaged battery.
- **Age:** Most batteries have a finite life span. A well-maintained battery can last up to five years. Neglect can reduce that life expectancy considerably.
- **Bloated or cracked battery case:** Replace the battery immediately if the case is cracking, as it could be because excessive heat is swelling the battery.

Understanding how car batteries work can help drivers keep their cars running smoothly. SC203721

Keep tires road-worthy for safer driving

Maintain the right pressure

Caring for tires not only improves safety, but also it extends the life of the tires, saving drivers money as a result. Michelin Tires says that simply checking the tires' inflation pressure can make a significant difference in how long tires last. For example, a tire that is consistently 20 percent under-inflated may see its life expectancy reduced by 20 percent. Tires that are not properly inflated also can have a high rolling resistance. In such instance, the engine must expend more effort to move the vehicle — thus eating up fuel. Pressure should be checked at ambient temperature before driving, states AAA. The recommended inflation pressure can be found in the drivers manual or on the tire.

Check tire tread

Tires rely on good tread depth to maintain traction and shed water during wet conditions. AAA recommends checking tread with a visual inspection and with the "quarter test." Insert a quarter into a tread groove with the top of Washington's head facing down. If the top of his head is not visible, the tires have at least 4/32" of tread and are acceptable for continued use. If the top of Washington's head shows, tires need to be replaced.

Learn about tire aging

Check the owner's manual for specific recommendations concerning replacing the spare tire for the vehicle. Some manufacturers state after six years, while others say 10 years is the maximum service life for tires. While most tire centers will use newly manufactured tires when replacing tires, you can double check the age of any tire by looking at the sidewall for the tire identification number (TIN), offers NHTSA. The last four digits are the week and year of manufacture.

Keep up on maintenance

Wheel alignment, tire rotation and tire balancing are all key to minimizing wear and extending the life and safety of tires. Each vehicle has specific recommendations, and drivers should consult their manuals to find those specifics. Tire function is an important part of maintaining vehicle safety and performance.

EXPERIENC

March 24, 2024

Schoharie County Office for the Aging 518-295-2001

Laughter Is Good For The Soul

- When I look in the mirror and see gray hair, tiny wrinkles, and dimming eyes I think, "They sure don't make mirrors like they

One benefit of old age is that your secrets are always safe with your friends...because they can't remember them!

- Now that I've gotten older, everything's finally starting to click for me, My knees, my back, my neck...

**************** Life Chat: Join us for a presentation on Aging in Place, Your Home for Your Lifetime, Thursday, March 28, 1:00 pm at The Gathering Place, 127 Kenvon Road, Cobleskill, NY 12043. Older adults often express a desire to age-in-place. What does this mean and how can we accomplish this? Learn about simple steps you can take that will make your home safe and comfortable and help you maintain your independence. Presenter: Lauren Harrington, Certified Aging-in-Place Specialist ***************

Parkinson Support Group will meet, 1:00 PM, Tuesday, April 9, 2024, at The Gathering Place, 127 Kenyon Rd. Cobleskill, please call Deb Dyer at 518-295-2001 to RSVP or please have any questions.

AARP Defensive Driving Class will be held April 19, 2024, from 9:00AM to 4:00PM, Course fee \$25.00 AARP Members, \$30.00 Non-AARP Member. Payment by check or Money Order Only made out to AARP. No Cash payments will be accepted. Bring your Driver's license & AARP Card if member. There will be a 30-minute lunch break. Please arrive a few minutes early for the registration process.

**************** Medicare Reminder Tips for preventing Medicare fraud.

- 1. Protect your Medicare number. Treat your Medicare card and number the same way you would a credit card number. Only give your Medicare number or your Social Security number to your doctors and other providers. Be careful when others ask for your Medicare number or offer free services if you provide vour Medicare number.
- 2. Protect your medical information. Be cautious if people other than your doctors or other medical professionals want to see your medical records or recommend services.
- 3. Learn more about Medicare's coverage rules. Be careful if a provider tells you there is a way to get Medicare to cover a service that normally is not covered.
- 4. Do not accept services you do not need. If a provider is pressuring you into getting tests or other services you feel are unnecessary, turn down care or ask to get a second opinion from another physician.
- 5. Be skeptical. It does not hurt to be wary if a provider says Medicare will pay for services that do not sound medically necessary (mud treatments, Swedish massages, and dance classes are examples of services promised in past fraud cases). Use your best judgment and refer to Medicare's coverage rules

***************** **Thought for the Week** – Let your smile change the world, but don't let the world change your smile.

IRS Wants You to Know About Schemes, Scams and Cons

"If it sounds too good to be true, it probably is!" Don't become a victim to any scheme that offers instant wealth or exemption from your obligation as a United States citizen to file tax returns and/or pay taxes. Some of these schemes can literally cost you your life savings. Others can result in your prosecution and imprisonment if you knowingly participate in them.

Abusive Return Preparer

Taxpayers should be very careful when choosing a tax preparer. While most preparers provide excellent service to their clients, a few unscrupulous return preparers file false and fraudulent tax returns and ultimately defraud their clients. It is important to know that even if someone else prepares your return, you are ultimately responsible for all the information on the tax return. Abusive Tax Schemes

Abusive tax scheme originally took the structure of fraudulent domestic and foreign trust arrangements. However, these schemes have evolved into sophisticated arrangements to give the appearance that taxpayers are not in control of their money. However, the taxpayers receive their funds through debit/credit cards or fictitious loans. These schemes often involve offshore banking and sometimes establish scam corporations or entities. Nonfiler Enforcement

There have always been individuals who, for a variety of reasons, argue taxes are voluntary or illegal. The courts have repeatedly rejected their arguments as frivolous and routinely impose financial penalties for raising such frivolous arguments. Take the time to learn the truth about frivolous tax arguments.

All Program and Emphasis Areas for Criminal Investigation

Criminal Investigation has categorized their investigative cases into specific program and emphasis areas of fraud. Tax Scams — How to Report Them To help the public recognize and avoid abusive tax schemes, the IRS offers an abundance of educational materials. Participating in an illegal scheme to avoid paying taxes can result in imprisonment and fines, as well as the repayment of taxes owed with penalties and interest. Education is the best way to avoid the pitfalls of these "too good to be true" tax scams.
